Flying H Genetics is retaining 50% semen interest in every bull sold. The buyer receives 100% possession and resale or salvage value and 50% semen interest. - If Flying H Genetics chooses to utilize their semen interest, they will coordinate with the owner and pay all expenses for their semen. If a semen sales market develops on a bull, Flying H Genetics will work with the owner to promote and sell semen splitting the expenses and income 50/50. Again, this semen reserve does not affect the buyer's ability to have full use of and receive full sale price for the bull with the semen reserve following the bull to the new owner. We estimate that this may only affect 1 or 2 bulls per year. If you have questions, please visit with Jared or Dick at any time.

IMPORTANT CONTACT INFORMATION FOR VIEWING AND BIDDING AT HOME

VIEW THE BULLS ON VIDEO - We video taped each bull & have them available for your viewing at www.flyinghgenetics.com. If you want a DVD of the bull videos to view at home, please call **417.309.0062** or email your request to jwareham@hughes.net.

**CONFERENCE PHONE CALL
1-800-582-9056**

CONFERENCE PHONE LINE - will be available to allow you to be in contact with the sale site, hear the sale, ask questions and bid. To use the conference call, please contact us ahead of the sale to get a buyer number. On sale day, just call **1-800-582-9056** and when prompted dial ***4935411***. There will be a representative on the phone at ringside to answer your questions and take your bids. You cannot use a speaker phone on the conference line as the background noise interferes with everyone else on the line and makes it very difficult to hear.

WE SUGGEST YOU USE BOTH the video to view the bulls - either online or DVD - and the conference call to do your bidding. This will limit the potential that a computer glitch will drop you and leave you without any contact with the sale. Also, on the conference call, you can ask questions and make sure of your bid.

If you have any problems with the internet or conference call, please contact Jared at 417-309-0062 or Dick at 308-962-6500 or 417-548-2333 (sale day phone).

REMEMBER - our Customer Satisfaction Guarantee assures you that the bulls you buy will meet or exceed all 17 Quality Standards used as the basis of our Quality Guaranteed Genetics pledge.

If you have any questions or need more information, call Jared at **417-309-0062** or Dick at **308-493-5411** prior to sale day. Discounts, delivery, warranty and other information are posted throughout the catalog.

Explanation of EPDs

- BW – Birth Weight:** expressed in pounds, is a predictor of his ability to transmit more or less birth weight.
- WW –Weaning Weight:** expressed in pounds, is a predictor of his ability to transmit more or less pounds at weaning.
- YW – Yearling Weight:** expressed in pounds, is a predictor of his ability to transmit more or less pounds of yearling growth.
- M – Milk:** is a predictor of his genetic potential for his daughter's milk and mothering ability.
- CW – Carcass Weight:** expressed in pounds is a predictor of his ability to transmit more or less carcass weight.
- RE – Ribeye Area:** expressed in square inches, is a predictor of his ability to transmit more or less Ribeye area.
- MB – Marbling:** expressed as a USDA marbling score & reflects his ability to improve marbling.
- INDEX**
 - ✓ **Simmental influenced cattle: API – All Purpose Index:** calculates the total potential value of his birth, growth, carcass, muscle & maternal genetics.
 - ✓ **Gelbvieh influenced cattle: \$CV – Carcass Value:** calculates the total potential value of his birth, growth, carcass, muscle & maternal genetics.
 - ✓ **Angus cattle: \$W – Weaning Value Index:** expressed in dollars per head, is the expected average difference in maternal preweaning performance.
- INDEX**
 - ✓ **Simmental influenced cattle: TI – Terminal Index:** calculates his terminal (non-maternal) value based on growth, muscle, & carcass.
 - ✓ **Gelbvieh influenced cattle: \$FM – Feedlot Merit:** calculates the value passed to progeny of expected gain and feedlot efficiency.
 - ✓ **Angus cattle: \$F – Feedlot Value Index:** expressed in dollars per head, is the expected average difference in progeny growth performance or saleable pounds.
- ADJ SC – Adjusted Scrotal Circumference:** indicates the adjusted yearling scrotal size of the bull. Adjusted for yearlings; 18 month old scrotal measurements are actual.
- FR – Frame Score:** indicates the yearling frame size or current frame score (18 month bulls only) of the bull.
- PEDIGREE**
- FHG STAR RANKING SYSTEM ** - This is a system we created to make your selection process much easier. The cattle have been evaluated in the FIVE key areas that commercial cattlemen are most concerned about – Growth, Muscle, Carcass, Maternal, and Forage-ability (how good of a grazer they are). Animals are given a ranking expressed in STARS that represents how strong they are in that area of production, with five stars being the best possible score. The scores are generated using the animals EPDs, actual performance data, and their Dams lifetime records for weaned calf performance. This will replace the footnote and help simplify your selection process a bunch!
- COLOR STATUS** - Homo Black (will only produce black calves), Black (carrier of red color gene), or Red.
- POLLED STATUS** - Homo Polled (is known by pedigree to be Homozygous), Polled, or Scurred (NOT horned).
- BREED MAKEUP**
- COOPERATOR HERD IDENTIFICATION**
- INDIVIDUALS BREED ASSOCIATION ASSIGNED REGISTRATION NUMBER**
- INDIVIDUALS BIRTH DATE**

Because of the interest in, need for, and importance of correctly identifying bulls to be used on first calf heifers, Flying H Genetics has developed a “**5 STAR SYSTEM**”. This system ranks bulls we believe (and guarantee) will work on heifers and not cause above normal calving difficulty due to size and shape of the calf.

A “**One Star**” bull should work on larger, well-developed heifers with above average pelvic measurements.

“**Three Star**” bulls increase the comfort level and degree of calving ease and can be used in most heifer development situations.

“**Five Star**” heifer bulls give exceptional calving ease with little assistance expected, except in abnormal presentations, etc.

All bulls offered by Flying H Genetics that qualify to be guaranteed as heifer bulls will be identified by the **5 STAR SYSTEM**.

Even this system cannot guarantee every heifer bred to these bulls will calve unassisted. There are at least 16 different criterion that affect calving ease with birth weight being the largest factor. Other factors like sex of calf, shape of calf and size of bone, condition score of heifer, age of heifer, feed protein level, weather prior to and during calving, the heifers genetics for calving ease and birth weight, gestation length, heterosis, pelvic opening size and presentation of calf all affect calving ease.

The **5 Star System** is not perfect but it will eliminate most problems caused by the genetics of the bulls breeding the heifers. And--if we find one that doesn't work and he is guaranteed for calving ease on heifers with our **5 Star System**--we will replace him with another bull of your choice with full credit from the original bull. It's not perfect, but it is one of the best systems and guarantees you'll find anywhere.

Questions, call Jared at 417.309.0062

FLYING H GENETICS - 18 MONTH HEIFER BULLS

Heifer Bulls are those that are bred to deliver slam-dunk, sleep at night calving ease! These bulls will excel in low birth weights and generally will give well above average calf performance due to the element of hybrid vigor attached to each mating. Many of these bulls will also be major improvers of carcass genetics.

FLYING H GENETICS - 18 MONTH ALL PURPOSE BULLS

All Purpose Bulls are those that can be used in a variety of breeding systems or scenarios. They are very well rounded bulls that tend to be above average in all aspects – calving ease, growth, maternal, & carcass. These bulls are bred to meet the needs of the modern cowherd along with the rest of the beef supply chain.

FLYING H GENETICS- SPRING CALVING COMMERCIAL BRED HEIFERS

We are offering a nice set of spring calving commercial bred SimAngus & Balancer heifers. These heifers have had all their necessary shots and have been preg checked to verify expected calving dates. They will be sold in Lots of 4 or 5 based on size, due dates, breed composition. The first Lot will be the "A" Lots and the subsequent Lots will follow in descending alphabetical order. For example – A then B and so on.

101 COMMERCIAL OPEN HEIFERS

LIMITED FREE DELIVERY

Flying H Genetics has offered limited free delivery for 20 years as a customer service and because we think it is important to visit your ranch, see your cattle and make sure our cattle are helping you produce the genetics you want.

Since we sell cattle nationwide, fuel and equipment costs force us to put some limits on free delivery. The seed stock business, like all other businesses, must address the costs of product delivery as part of their overall customer service plan.

To treat every customer fairly, we have established the following delivery policy:

- A. Every animal valued over \$1500 will be delivered free within 200 miles of animal's location.
- B. Any group of animals with an average value over \$1500 and a combined value over \$15,000 will be delivered free within the 48 United States.
- C. All other animals valued over \$1500 will be delivered the first 200 miles free with additional miles charged at the rate of \$1.00/mile prorated per head with freight charges guaranteed not to exceed \$250 per head.

For example, if we have five head to be delivered 400 miles and they don't qualify for free delivery under "B" then the cost per head would be (400 miles – 200 miles free = 200 miles x \$1.00 = \$200 or \$40 per head).

- D. Animals valued less than \$1500 will be delivered on a case by case basis.

If you have any questions, please contact Dick at 308.493.5411 or Jared at 417.309.0062

DEATH & INJURY WARRANTY

Flying H Genetics has offered to share death and injury losses suffered during the first breeding season with customers for years. After some confusion over the old warranty and interest by many customers to cover the full cost of their purchases at a reasonable cost, we have initiated the following new warranty.

COVERAGE/LIMITATIONS

The coverage of this warranty is limited to the first breeding season or a maximum of 6 months from the date of purchase, unless other arrangements are made ahead of time. Indemnity under this warranty covers all death and loss-of-use injuries except those caused by negligence or willful misconduct or mistreatment of the bulls covered. Replacement value will be limited to actual purchase cost of the Flying H Genetics bull covered minus any salvage value or other compensation received by the customer.

CLAIMS

All claims for death or injury must be reported to Flying H Genetics within 24 hours of discovery and a complete diagnosis by a licensed veterinarian must be reported.

INJURED

If the injury is not life threatening or permanent and the bull can be returned to service, Flying H Genetics will work with the customer to supply a replacement bull to use at no cost, until the original bull can be returned to service.

LOSS DUE TO INJURY

If the injury is permanent and prevents the bull from returning to service, Flying H Genetics will supply a replacement bull as close to the original bull's type and quality as possible to complete the first breeding season. At the end of the breeding season, the customer can keep the bull as the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. The credit will equal the price of the original bull minus salvage value if any from the original bull. The customer agrees to provide humane care and obtain maximum salvage value from the injured bull. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

LOSS DUE TO DEATH

When a Flying H Genetics bull dies between the date of purchase and the end of the first breeding season, through no fault of the customer as described above, Flying H Genetics will supply a replacement bull, as close to the original bull's type and quality as possible, to finish out the breeding season. At the end of the breeding season, the customer can either keep the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. This credit will equal the purchase price of the original bull minus any compensation received if insured by an insurance company. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

COST

Cost for the death and injury warranty will be 5% of purchase price, due at the time of purchase. If a customer chooses not to cover their animal against death and injury, they assume all loss due to death or injury of their bull. This warranty does not affect other customer services like the customer satisfaction and calving ease guarantees that all Flying H Genetics bulls carry.
