

BACK TO THE FUTURE?

“Looks like Joe’s SimAngus & Balancer bulls are really adding pounds to his calves.”

“Yeah, they’re real even & thick made.”

“My calves grew like that when I used to crossbreed, but they weren’t that even.”

“What’s the difference?”

“They call it ‘Planned Crossbreeding’ or using the right genetics.”

“Sure has made a big difference.”

“Doesn’t he get his bulls from Flying H?”

“Yep, why don’t you give ‘em a call.”

FLYING H GENETICS

Jared & Jill Wareham

Missouri Regional Affiliate
