AN ARTICLE I READ EARLIER THIS FALL REALLY INTRIGUED ME. The focus of the article was, "how well do you know your seedstock supplier." It was based around the idea to purchase bulls from a supplier who believes what you believe by raising cattle the way you do. Don't just buy bulls because of the ranch name, a well-planned advertising scheme or because everyone else is doing it.

As you look into the future of the cattle business what do you see? I see opportunity. An opportunity to create a more efficient cow herd, an opportunity to get paid a premium for your calves, an opportunity to build new lifelong friendships and an opportunity to raise our families in agriculture.

Cow herd efficiency is where profit starts and should be at the forefront of our focus as we move forward. Fertile cows that breed back quickly, wean off a higher percent of their body weight and stay in the cow-herd longer are guaranteed to increase profits in all economic times. Utilizing a planned crossbreeding system helps maximize efficiency. Studies have shown that the use of heterosis in a cowherd can directly influence the output of a cow by approximately 25%. This in turn reduces your cost of production by 8 to 10 percent!!! The lifespan of a crossbred cow is approximately 1.5 years longer than a straightbred cow and results in an increase in lifetime productivity of approximately one calf and 600 lbs. WOW!!!

Receiving a premium for your calves is an added bonus that does not increase your cost of production. With growth in traceability, premiums for reputation sellers will continue to grow well into the future.

Flying H Genetics believes in a well-planned crossbreeding program that challenges our "Money Makin' Mamas™" to perform on roughages, continually raise good calves and breed back quickly. We focus on convenience traits like calving ease, mothering ability, docility and teat and udder quality. We also challenge our replacement heifers by raising them on cornstalks and requiring them to breed in a short window.

Our bulls must perform on their "Roughage N Ready" ration while surviving rigorous culling processes. We focus on structural soundness and guarantee aggressive breeders. We offer bulls with maternal strengths and bulls with performance and strong carcass traits.

We invite you to check us out. Set up a time to come by and see the cow herd. We love to talk cattle and would love the opportunity to introduce our family to yours.

God's Blessing in 2020.

CONFERENCE PHONE CALL

CONFERENCE PHONE LINE - will be available to allow you to be in contact with the sale site, hear the sale, ask questions and bid. To use the conference call, please contact us ahead of the sale to get a buyer number. On sale day, just call **1-877-820-7831** and when prompted dial ***4935411***. There will be a representative on the phone at ringside to answer your questions and take your bids. **You cannot use a speaker phone on the conference line as the background noise interferes with everyone else on the line and makes it very difficult to hear.**

If you have any problems with the internet or conference call, please contact the FHG Staff.

REMEMBER - our Customer Satisfaction Guarantee assures you that the bulls you buy will meet or exceed all 17 Quality Standards used as the basis of our Quality Guaranteed Genetics pledge.

If you have any questions or need more information, please contact the FHG Staff.

For information on **Volume Discounts, Limited Free Delivery, Death & Injury Warranty and Heifer Bull Key** see inside back cover of sale book

Comments From Our Customers

SCOTT WELLS, KANSAS SAYS....

"I have been buying bulls from Flying H since 1999 and I am really pleased with how their bulls get the job done. I have no calving problems and the calves really put on the pounds which helps pay the bills. Being able to buy bulls that give me heterosis is also very important because I keep replacement heifers and they make better cows than my straight Angus did. Flying H Genetics also have a great selection so I have plenty of bulls to pick my favorites from. I would recommend Flying H to anyone wanting to make their cattle better."

RAYMOND BIRNEY, SOUTHWEST KANSAS SAYS...

"Flying H Genetics and the Helms Family has always treated me fair and honestly. I really like being able to buy from Nebraska or Missouri giving me more bulls to pick from and the volume discounts apply to all. I have had no problems with feet or health; the bulls are not fed fat and are aggressive breeders. I really like the Balancers, that Gelbvieh X Angus cross works great for me."

BRIAN KOLBET, HAYS CENTER, NE WROTE...

"I have been buying bulls from Flying H since 2001. With Flying H Bulls I have increased weaning weights, decreased cow size and improved udders. The cows are easier fleshing and excellent mothers. This year I sold my natural serviced bred heifers and topped the market, bringing \$100 more per head than the AI bred Angus heifers. They came straight off milo stalk pasture without supplement. Flying H Genetics work!"

FLYING H GENETICS - COOP HERDS

We can offer you this tremendous set of bulls thanks to the hard work and genetic craftsmanship of the breeders below. The Flying H network is a series of relationships

that allow our herds and those of our coop breeders to function as one interconnected collection of genetic resources for our customers

FURTHER INFORMATION:

INSPECTION OF SALE CATTLE: The cattle are at the ranch and are ready for viewing any time prior to sale day. Please call ahead so someone is available to help you.

TERMS AND CONDITIONS: All cattle sell according to the terms and conditions recommended by the American Gelbvieh Association. Terms of the sale are cash. Every animal will be sold to the highest bidder. Announcements sale day take precedence over printed material in this catalog. All cattle are the property of the buyers as soon as sold and will be cared for until April 1st at no additional cost. Buyer may pickup their purchases anytime after the sale or Flying H Genetics will deliver according to their delivery policy as stated in the sale book.

Any person attending the sale does so at their own risk. Neither the owners or Flying H Genetics assumes any liability, legal or otherwise. All animals listed in the catalog as being Homozygous Polled or Homozygous Black are done so to the best of our knowledge. We are not liable for any inaccuracies. Registration papers will be transferred to the new buyer at the sellers expense.

ABSENTEE BIDS: The following 3 options are available.

1. Call a member of the FHG Staff for a conference call buyer number (info on page 1).
2. Register, view and bid online with DVAuction.com
3. Call a member of the FHG Staff or Livestock Press to have it handled personally..

HEALTH AND BREEDING SOUNDNESS: All animals have been on a complete health program and health papers are available for all 48 states. All bulls will have passed a Breeding Soundness Exam and Semen Test prior to the sale. All sale animals have also been tested negative for PI BVD.

*Since 1982
Flying H Genetics has
guaranteed calving ease
on every bull sold.
Bulls for use on heifers
are identified with a
star system.*

Flying H Genetics Roughage 'N Ready Herd Bull Sale

Black Balancer,[®] Gelbvieh, SimAngus,[™] and Fusion[™] Bulls

Welcome to one of the best selections of industry relevant genetics you can find. Combining breeds to produce superior genetics takes proper breed selection focused on **complementation and the beef industry's needs**. Choosing superior genetics from each breed to complement each individual mating for a variety of necessary traits gives you superior genetics that produce superior cattle.

The combination of superior genetics plus the positive benefits of heterosis on many traits, especially ones hard to improve like fertility, longevity and efficiency, will give you more value and a superior product. Complementing Angus with Gelbvieh and Simmental, combined with heterosis in both the cow and the calf, adds value, profits and success to the entire beef industry. Enjoy!

Red Balancer and Red Angus Bulls

Here is the RED version of breeds complementing and utilizing heterosis. You'll find both purebreds and hybrids/composites to meet your needs. When one realizes the challenge we are given by the industry; give us profitable, productive, long lasting cows **AND** give us beef that is satisfying to the consumer and profitable to the industry, one soon realizes we need more than one breed and one color. Varied environments and industry needs mean we need to utilize the best genetics from

multiple breeds to produce superior genetics for the entire industry. Breeds that are selected and mated to complement and produce superior genetics in multiple traits, tested and culled without exception produces superior genetics for the entire beef industry. Enjoy!

FLYING H GENETICS

WHAT DOES THIS MEAN?

BRED 4 PROFIT is fairly easy to explain, we're talking genetics both measured and observed. Utilizing DNA enhanced EPD's combined with phenotypic criteria we can make genetic progress in multiple traits at the same time. These tools allow us to produce Superior Genetics and some not so superior genetics that must be eliminated. With Flying H Genetics 17 Quality Standards as our guide we can now produce more Superior Genetics than ever before.

BUILT 2 WORK is a challenge because it requires us to do what is right not necessarily the most profitable.

For many decades, most bulls sold have been developed for Sale Day--clipped and washed and fattened to look their very best so they'll bring more money.

Not a bad idea from the seller's side of the fence, but what about the bull and the bull buyer?

Why is it so hard to put the buyer and the bull first when deciding how to develop sale bulls? Excess FAT is detrimental to both the bull's longevity and the buyer's ability to evaluate true muscling, thickness and growth. Does 200 pounds of extra fat really make the bull more muscular or growthy just because he weighs 200 pounds more? NO!

We know EPD's predict genetics, did you know that FAT predicts lazy, bad footed bulls.

Flying H Genetics has been developing ROUGHAGE 'N READY and GROWN ON GRASS/FESCUE ADAPTED Bulls for years because it's better for the bulls and our customers. Bulls developed into athletic, muscular and aggressive breeding machines, with hard, sound feet and legs, correct structure and guaranteed breeders. Take your pick—Superior Genetics BRED 2 WORK!

FLYING H GENETICS DISPOSITION SCORING

Because disposition is a very important management and safety issue, Flying H Genetics has researched and developed a system to score all of their cattle, including any cattle sold for breeding purposes, for disposition to eliminate the unacceptable ones. We have been culling on disposition for years but scoring them quantifies and identifies them more accurately making culling more accurate and effective.

Cattle are a herd instinct animal. Separate them from the herd and their natural response is to flee back to the group or fight for their life. Domesticating them has gentled them but their natural instincts of flight and fight are still there at varying degrees. Generally, the sooner and more often cattle are in contact with and handled by humans in a calm, nonthreatening way, the more trusting and less flighty or threatened they will feel.

Knowing this, our system separates an individual animal from the group into a small pen with one or two people to add a common stressor. Since all cattle have a different disposition (just like people) this will create different degrees of nervousness, flight and fight that can be scored. Scoring the different levels of nervousness, flight and fight allows us to identify different levels of disposition. The scores range from 1 to 5 with 5 being the most calm. This is a subjective score but certain actions help group the cattle into the five different levels. Following is a general description of the type of actions observed while scoring that help rank each individual's disposition.

One Star—animal is very nervous and agitated and is looking for an escape route. Will not stop and stand, tests the fence and will show fight and turn on you if pressed. When the out gate is opened he leaves on the run. He's always at the

back of a group, head up and keeps his distance. He will make others nervous and flighty and is hard to sort from the group. Anything new will create great distress and he will get more agitated the longer he's held separately. Due to safety issues these are culled immediately.

Two Star—animal is nervous and very uncomfortable. He will keep moving, walking the fence and trot or run if approached. Not as likely to show fight but will exit fast. Very observant and keeps his distance even in a group. He will be a little hard to sort from the group. He's always nervous and flighty in a strange situation. He presents a safety concern and causes handling problems with the whole herd so is culled asap.

Three Star—animal is uncomfortable wanting to keep distance. He will stop but is very attentive and moves without much pressure. He'll exit at a fast walk or slight trot. Handles fine in a group but gets nervous when separated, wanting to rejoin the herd. Can get excited if pressured or forced out of comfort zone so low stress, low pressure handling helps.

Four Star—animal moves when pressure is applied but will stop easily. Will stand and allow you to approach but not get too close. Exits at a walk. Fast movements, loud noises and strange situations will make him nervous. Low stress handling works great.

Five Star—animal is very calm and gentle, easy to sort and move. Will stand, allow you to approach and maybe touch him and may even approach you. Needs to be urged to leave the pen. Can get excited but calms down quickly. Responds well to proper handling.

Flying H Genetics – Additional Information

- **For an accurate ranking or comparison** within the different breeds we use our 5 STAR INDEX to rank them so you can easily find bulls that fit the needs you have. Need more muscle? Pick 4 and 5 STAR MUSCLE bulls. Need a bull to produce replacement heifers? Pick bulls with 4 and 5 STARS for MATERNAL. There are a number of bulls that have 5 STARS for all traits which means they rank in the top 25% of their breed for all these traits—exceptional genetic packages. **Our 5 STAR INDEX allows you to find the best genetics for your needs without having to know all the numbers and breed rankings.**
- **Since 2012 Gelbvieh, Balancer, Simmental, SimAngus and Red Angus EPDs have all been calculated by International Genetics Solutions based in Bozeman, Montana.** Each breed has a slightly different average but all use the world's largest multibreed data set with over 12,000,000 data points to calculate their EPDs and are comparable against each other. We offer you several genetic packages so you can select from the best genetics possible instead of being limited to just one breed or hybrid. **What makes this extra special is that, since all breeds offered are evaluated genetically with the same data set and reported on the same base, they are comparable against each other.**
- **Why pay \$6 per pound for fat?** The only reason bulls are fed fat is to make them look better because it increases their weights and they "look" thicker and smoother; none of this changes the genetics or pounds they transfer to their calves. Roughage 'N Ready bulls are the real deal—what you see is what you get—and they will look better, not worse, because they will continue to grow instead of melting off 100 pounds of fat. **If our weaning weights and yearling weights are less than you are used to, just add the 100 pound—fat—factor and I bet you'll agree that they are as good as any in the industry**
- **We offer you frame scores on every bull as an important piece of data** to help quantify the potential mature size and composition of the bulls. After 30 years of frame scoring, I can tell you it is the least accurate measurement taken. Repeatability is the lowest of anything we measure, so we recommend that you use it but don't get so specific that if it is a half a frame score taller or shorter than you like, don't eliminate the bull just for his frame score. A half a frame score is only 1" and can be affected by how the bull holds his head or places his feet while taking the measurement. **Obviously, there is a noticeable difference between a frame 5 and 6 bull but don't discount a bull if he is a half score off from your ideal because you may eliminate a tremendous bull that will make you a lot of money.**

Flying H Genetics Roughage 'N Ready Herd Bull Sale

IDENTIFYING HEIFER BULLS

Because of the interest in, need for, and importance of correctly identifying bulls to be used on first calf heifers, Flying H Genetics has developed a “**5 STAR SYSTEM**”. This system ranks bulls we believe (and guarantee) will work on heifers and not cause above normal calving difficulty due to size and shape of the calf.

A “**One Star**” bull should work on larger, well-developed heifers with above average pelvic measurements.

“**Three Star**” bulls increase the comfort level and degree of calving ease and can be used in most heifer development situations.

“**Five Star**” heifer bulls give exceptional calving ease with little assistance expected, except in abnormal presentations, etc.

All bulls offered by Flying H Genetics that qualify to be guaranteed as heifer bulls will be identified by the **5 Star System**.

Even this system cannot guarantee every heifer bred to these bulls will calve unassisted. There are at least 16 different criterion that affect calving ease with birth weight being the largest factor. Other factors like sex of calf, shape of calf and size of bone, condition score of heifer, age of heifer, feed protein level, weather prior to and during calving, the heifers genetics for calving ease and birth weight, gestation length, heterosis, pelvic opening size and presentation of calf all affect calving ease.

The **5 Star System** is not perfect but it will eliminate most problems caused by the genetics of the bulls breeding the heifers. And—if we find one that doesn't work and he is guaranteed for calving ease on heifers with our **5 Star System**—we will replace him with another bull of your choice with full credit from the original bull. It's not perfect, but it is one of the best systems and guarantees you'll find anywhere.

Questions, call the FHG Staff.

DEATH & INJURY WARRANTY

Flying H Genetics has offered to share death and injury losses suffered during the first breeding season with customers for years. After some confusion over the old warranty and interest by many customers to cover the full cost of their purchases at a reasonable cost, we have initiated the following warranty.

COVERAGE/LIMITATIONS

The coverage of this warranty is limited to the first breeding season or a maximum of 6 months from the date of purchase, unless other arrangements are made ahead of time. Indemnity under this warranty covers all death and loss-of-use injuries except those caused by negligence or willful misconduct or mistreatment of the bulls covered. Replacement value will be limited to actual purchase cost of the Flying H Genetics bull covered minus any salvage value or other compensation received by the customer.

CLAIMS

All claims for death or injury must be reported to Flying H Genetics within 24 hours of discovery and a complete diagnosis by a licensed veterinarian must be reported.

INJURED

If the injury is not life threatening or permanent and the bull can be returned to service, Flying H Genetics will work with the customer to supply a replacement bull to use at no cost, until the original bull can be returned to service.

LOSS DUE TO INJURY

If the injury is permanent and prevents the bull from returning to service, Flying H Genetics will supply a replacement bull as close to the original bull's type and quality as possible to complete the first breeding season. At the end of the breeding season, the customer can keep the bull as

VOLUME DISCOUNT ON BULLS

Volume discount of 5% will be credited on 5-9 bulls and 10% discount will be credited on 10 or more bulls purchased in either the Nebraska or Missouri spring sales or combined purchases from both spring sales. You can use your purchases in Nebraska to help meet the volume discounts in Missouri to be applied to bulls purchased in Missouri.

LIMITED FREE DELIVERY

Flying H Genetics has offered limited free delivery for 20 years as a customer service and because we think it is important to visit your ranch, see your cattle and make sure our cattle are helping you produce the genetics you want.

Since we sell cattle nationwide, fuel and equipment costs force us to put some limits on free delivery. The seed stock business, like all other businesses, must address the costs of product delivery as part of their overall customer service plan.

To treat every customer fairly, we have established the following delivery policy:

- A. Every animal valued over \$3,000 will be delivered free within 200 miles of sale location.
- B. All other animals valued over \$3,000 will be delivered the first 200 miles free with additional miles prorated per head with freight charges guaranteed not to exceed \$250 per head.
- C. Animals valued less than \$3,000 will be delivered on a case by case basis.

If you have any questions, please contact the FHG Staff.

the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. The credit will equal the price of the original bull minus salvage value if any from the original bull. The customer agrees to provide humane care and obtain maximum salvage value from the injured bull. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

LOSS DUE TO DEATH

When a Flying H Genetics bull dies between the date of purchase and the end of the first breeding season, through no fault of the customer as described above, Flying H Genetics will supply a replacement bull, as close to the original bull's type and quality as possible, to finish out the breeding season. At the end of the breeding season, the customer can either keep the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. This credit will equal the purchase price of the original bull minus any compensation received if insured by an insurance company. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

COST

Cost for the death and injury warranty will be 10% of purchase price, due at the time of purchase. If a customer chooses not to cover their animal against death and injury, they assume all loss due to death or injury of their bull. This warranty does not affect other customer services like the customer satisfaction and calving ease guarantees that all Flying H Genetics bulls carry. Warranty is not available on replacement bulls.
