## VISION 20/20

**Is your vision 20/20?.....Are you looking at 2020 and beyond?.....We ARE!**

Dick & Bonnie Helms with grand daughters (left to right), Lilly, Abby and Savannah

Tim and Karla Petermann

Kyle and Kayla Helms with daughters (left to right), Lilly and Abby

Bryan and Shannon Helms with daughter Savannah

Cody and Casie Helms with sons (left to right), Kylan and Hayden

**AN ARTICLE I READ EARLIER THIS FALL REALLY INTRIGUED ME.** The focus of the article was, "how well do you know your seedstock supplier." It was based around the idea to purchase bulls from a supplier who believes what you believe by raising cattle the way you do. Don't just buy bulls because of the ranch name, a well-planned advertising scheme or because everyone else is doing it.

As you look into the future of the cattle business what do you see? I see opportunity. An opportunity to create a more efficient cow herd, an opportunity to get paid a premium for your calves, an opportunity to build new lifelong friendships and an opportunity to raise our families in agriculture.

Cow herd efficiency is where profit starts and should be at the forefront of our focus as we move forward. Fertile cows that breed back quickly, wean off a higher percent of their body weight and stay in the cow-herd longer are guaranteed to increase profits in all economic times. Utilizing a planned crossbreeding system helps maximize efficiency. Studies have shown that the use of heterosis in a cowherd can directly influence the output of a cow by approximately 25%. This in turn reduces your cost of production by 8 to 10 percent!!! The lifespan of a crossbred cow is approximately 1.5 years longer than a straightbred cow and results in an increase in lifetime productivity of approximately one calf and 600 lbs. WOW!!!

Receiving a premium for your calves is an added bonus that does not increase your cost of production. With growth in traceability, premiums for reputation sellers will continue to grow well into the future.

Flying H Genetics believes in a well-planned crossbreeding program that challenges our "Money Makin' Mamas™" to perform on roughages, continually raise good calves and breed back quickly. We focus on convenience traits like calving ease, mothering ability, docility and teat and udder quality. We also challenge our replacement heifers by raising them on cornstalks and requiring them to breed in a short window.

Our bulls must perform on their "Roughage N Ready" ration while surviving rigorous culling processes. We focus on structural soundness and guarantee aggressive breeders. We offer bulls with maternal strengths and bulls with performance and strong carcass traits.

We invite you to check us out. Set up a time to come by and see the cow herd. We love to talk cattle and would love the opportunity to introduce our family to yours.

**God's Blessing in 2020.**

## Black Balancer®, Gelbvieh, and Fusion™ Bulls

Welcome to one of the best selections of industry relevant genetics you can find. Combining breeds to produce superior genetics takes proper breed selection focused on complementation and the beef industry's needs. Choosing superior genetics from each breed to complement each individual mating for a variety of necessary traits gives you superior genetics that produce superior cattle.

The combination of superior genetics plus the positive benefits of heterosis on many traits, especially ones hard to improve like fertility, longevity and efficiency, will give you more value and a superior product. Complementing Angus with Gelbvieh and Simmental, combined with heterosis in both the cow and the calf, adds value, profits and success to the entire beef industry. Enjoy!

## Red Balancer Bulls

Here is the RED version of breeds complementing and utilizing heterosis. You'll find both purebreds and hybrids/composites to meet your needs. When one realizes the challenge we are given by the industry; give us profitable, productive, long lasting cows **AND** give us beef that is satisfying to the consumer and profitable to the industry, one soon realizes we need more than one breed and one color. Varied environments and industry needs mean we need to utilize the best genetics from

multiple breeds to produce superior genetics for the entire industry. Breeds that are selected and mated to complement and produce superior genetics in multiple traits, tested and culled without exception produces superior genetics for the entire beef industry. Enjoy!

# Flying H Genetics Roughage 'N Ready Private Treaty Bull Sale

## IDENTIFYING HEIFER BULLS

Because of the interest in, need for, and importance of correctly identifying bulls to be used on first calf heifers, Flying H Genetics has developed a “**5 STAR SYSTEM**”. This system ranks bulls we believe (and guarantee) will work on heifers and not cause above normal calving difficulty due to size and shape of the calf.

A “**One Star**” bull should work on larger, well-developed heifers with above average pelvic measurements.

“**Three Star**” bulls increase the comfort level and degree of calving ease and can be used in most heifer development situations.

“**Five Star**” heifer bulls give exceptional calving ease with little assistance expected, except in abnormal presentations, etc.

All bulls offered by Flying H Genetics that qualify to be guaranteed as heifer bulls will be identified by the **5 Star System**.

Even this system cannot guarantee every heifer bred to these bulls will calve unassisted. There are at least 16 different criterion that affect calving ease with birth weight being the largest factor. Other factors like sex of calf, shape of calf and size of bone, condition score of heifer, age of heifer, feed protein level, weather prior to and during calving, the heifers genetics for calving ease and birth weight, gestation length, heterosis, pelvic opening size and presentation of calf all affect calving ease.

The **5 Star System** is not perfect but it will eliminate most problems caused by the genetics of the bulls breeding the heifers. And—if we find one that doesn't work and he is guaranteed for calving ease on heifers with our **5 Star System**—we will replace him with another bull of your choice with full credit from the original bull. It's not perfect, but it is one of the best systems and guarantees you'll find anywhere.

Questions, call the FHG Staff.

## DEATH & INJURY WARRANTY

Flying H Genetics has offered to share death and injury losses suffered during the first breeding season with customers for years. After some confusion over the old warranty and interest by many customers to cover the full cost of their purchases at a reasonable cost, we have initiated the following warranty.

### COVERAGE/LIMITATIONS

The coverage of this warranty is limited to the first breeding season or a maximum of 6 months from the date of purchase, unless other arrangements are made ahead of time. Indemnity under this warranty covers all death and loss-of-use injuries except those caused by negligence or willful misconduct or mistreatment of the bulls covered. Replacement value will be limited to actual purchase cost of the Flying H Genetics bull covered minus any salvage value or other compensation received by the customer.

### CLAIMS

All claims for death or injury must be reported to Flying H Genetics within 24 hours of discovery and a complete diagnosis by a licensed veterinarian must be reported.

### INJURED

If the injury is not life threatening or permanent and the bull can be returned to service, Flying H Genetics will work with the customer to supply a replacement bull to use at no cost, until the original bull can be returned to service.

### LOSS DUE TO INJURY

If the injury is permanent and prevents the bull from returning to service, Flying H Genetics will supply a replacement bull as close to the original bull's type and quality as possible to complete the first breeding season. At the end of the breeding season, the customer can keep the bull as

## VOLUME DISCOUNT ON BULLS

Volume discount of 5% will be credited on 5-9 bulls and 10% discount will be credited on 10 or more bulls purchased in either the Nebraska or Missouri spring sales or combined purchases from both spring sales. You can use your purchases in Nebraska to help meet the volume discounts in Missouri to be applied to bulls purchased in Missouri.

## LIMITED FREE DELIVERY

Flying H Genetics has offered limited free delivery for 20 years as a customer service and because we think it is important to visit your ranch, see your cattle and make sure our cattle are helping you produce the genetics you want.

Since we sell cattle nationwide, fuel and equipment costs force us to put some limits on free delivery. The seed stock business, like all other businesses, must address the costs of product delivery as part of their overall customer service plan.

To treat every customer fairly, we have established the following delivery policy:

- A. Every animal valued over \$3,000 will be delivered free within 200 miles of sale location.
- B. All other animals valued over \$3,000 will be delivered the first 200 miles free with additional miles prorated per head with freight charges guaranteed not to exceed \$250 per head.
- C. Animals valued less than \$3,000 will be delivered on a case by case basis.

If you have any questions, please contact the FHG Staff.

the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. The credit will equal the price of the original bull minus salvage value if any from the original bull. The customer agrees to provide humane care and obtain maximum salvage value from the injured bull. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

### LOSS DUE TO DEATH

When a Flying H Genetics bull dies between the date of purchase and the end of the first breeding season, through no fault of the customer as described above, Flying H Genetics will supply a replacement bull, as close to the original bull's type and quality as possible, to finish out the breeding season. At the end of the breeding season, the customer can either keep the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. This credit will equal the purchase price of the original bull minus any compensation received if insured by an insurance company. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

### COST

Cost for the death and injury warranty will be 10% of purchase price, due at the time of purchase. If a customer chooses not to cover their animal against death and injury, they assume all loss due to death or injury of their bull. This warranty does not affect other customer services like the customer satisfaction and calving ease guarantees that all Flying H Genetics bulls carry. Warranty is not available on replacement bulls.
