2020 a "Year for your Vision"... Are you still looking forward... We sure are!!

2020 HAS BEEN AN INTERESTING AND CHALLENGING YEAR, TO SAY THE LEAST. There have been many obstacles that have tested the strength and endurance of cattlemen and farmers alike. These challenges have had everyone thinking outside the box, but in the long run everyone's "Vision" still goes back to the foundation of a profitable operation - create the most cost effective, efficient and marketable product possible.

One of the building blocks of the foundation we focus heavily on is an **efficient** cow. We study her ability to breed back (fertility), while raising a calf (pounds pay the bills) and staying in the herd a long time (stayability). **In hard economic times efficient cows help everyone's bottom line.** A second building block heavily focused on is the use of a **crossbreeding program**; this allows the use of **heterosis** in the operation. **Heterosis** can increase a cow's efficiency as much as 25% while reducing her cost of production up to 10%. The added pounds and value to your calves is a welcome added bonus.

Flying H Genetics has been fine tuning our crossbreeding program, "**Money Makin Mamas**", for almost two decades. These "**Mamas**" have to perform on a roughage diet while still producing big calves and rebreeding in a timely manner. They don't get off quite that easy here!! We also study mothering ability, calving ease, teat & udder quality and docility. If these "**Mamas**" make it at Flying H Genetics they're worth every penny we spend on them.

Our bulls pass through a similar regiment before we offer them to you for your breeding program. Our bulls must perform in our "**Grown on Grass**" fescue pasture program, all while being subjected to our "**17 Quality Standard**" culling process. We look at structural soundness, breeding aggression and disposition just to name a few. Our spectrum of bulls ranges from highly maternal (calving ease) type bulls to highly terminal (high growth) type bulls; from purebreds to 4 breed composites and everything in between. So no matter which type of bull you're looking for we'll match you with one or many that fit your "**Vision**".

We would like to invite you to come and see the operation. Call to set up a time or just to visit, we are always willing and eager to talk cattle and answer any questions you might have. Our goal is to fit you with the right bull(s) that will improve your operation, cow herd and bottom line to put more profit in your pocket.

May the Lord bless and guide you through your vision in life

IDENTIFYING HEIFER BULLS

It is very important to correctly identify bulls to be used on first calf heifers. Therefore, we use a combination of two tools. We start with the guidelines for heifer bull qualification established by the University of Missouri Extension's **Show-Me Select Heifer Program**. This system ranks bulls with the desired amount of calving ease or CE to work on heifers and minimize any chance of calving difficulty due to the size and shape of the calf. The Show-Me Select Program has set minimum thresholds for CE that a bull **must** have to be used on a heifer. Furthermore, those standards are based on EPDs calculated by breed associations only - i.e. no generically calculated numbers. We also use some data we collect to help strengthen the accuracy of this process. We analyze a bull's birth weight and physical design to assess their ability to make a "sleep at night" CE bull. All Bulls in this catalog that meet or exceed the standards set by the Show-Me Select Program and our secondary evaluation will be identified by the "Show Me Select Heifer Qualified" stamp in their lot box. If you have any questions contact us and refer to the Show-Me Select website at <http://agebb.missouri.edu/select/prgmreq.htm>

DEATH & INJURY WARRANTY

Flying H Genetics has offered to share death and injury losses suffered during the first breeding season with customers for years. After some confusion over the old warranty and interest by many customers to cover the full cost of their purchases at a reasonable cost, we have initiated the following warranty:

COVERAGE/LIMITATIONS

The coverage of this warranty is limited to the first breeding season or a maximum of 6 months from the date of purchase, unless other arrangements are made ahead of time. Indemnity under this warranty covers all death and loss-of-use injuries except those caused by negligence or willful misconduct or mistreatment of the bulls covered. Replacement value will be limited to actual purchase cost of the Flying H Genetics bull covered minus any salvage value or other compensation received by the customer.

CLAIMS

All claims for death or injury must be reported to Flying H Genetics within 24 hours of discovery and a complete diagnosis by a licensed veterinarian must be reported.

INJURED

If the injury is not life threatening or permanent and the bull can be returned to service, Flying H Genetics will work with the customer to supply a replacement bull to use at no cost, until the original bull can be returned to service.

LOSS DUE TO INJURY

If the injury is permanent and prevents the bull from returning to service, Flying H Genetics will supply a replacement bull as close to the original bull's type and quality as possible to complete the first breeding season. At the end of the breeding season, the customer can keep the bull as

VOLUME DISCOUNT ON BULLS

Volume discount of 5% will be credited on 5-9 bulls and 10% discount will be credited on 10 or more bulls purchased in either the Nebraska or Missouri sales or combined purchases from both sales. You can use your purchases in Nebraska to help meet the volume discounts in Missouri to be applied to bulls purchased in Missouri.

LIMITED FREE DELIVERY

Flying H Genetics has offered limited free delivery for 20 years as a customer service and because we think it is important to visit your ranch, see your cattle and make sure our cattle are helping you produce the genetics you want.

Since we sell cattle nationwide, fuel and equipment costs force us to put some limits on free delivery. The seed stock business, like all other businesses, must address the costs of product delivery as part of their overall customer service plan.

To treat every customer fairly, we have established the following delivery policy:

- A. Every animal valued over \$3,000 will be delivered free within 200 miles of sale location.
- B. All other animals valued over \$3,000 will be delivered the first 200 miles free with additional miles prorated per head with freight charges guaranteed not to exceed \$250 per head.
- C. Animals valued less than \$3,000 will be delivered on a case by case basis. If you have any questions, please contact our FHG Staff.

the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in any upcoming sale. The credit will equal the price of the original bull minus salvage value if any from the original bull. The customer agrees to provide humane care and obtain maximum salvage value from the injured bull. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

LOSS DUE TO DEATH

When a Flying H Genetics bull dies between the date of purchase and the end of the first breeding season, through no fault of the customer as described above, Flying H Genetics will supply a replacement bull, as close to the original bull's type and quality as possible, to finish out the breeding season. At the end of the breeding season, the customer can either keep the replacement bull as fulfillment of this warranty or return him to Flying H Genetics and receive credit on a replacement in next year's sale. This credit will equal the purchase price of the original bull minus any compensation received if insured by an insurance company. This guarantees the customer a bull to get their cows bred and full compensation for the purchase price of the bull through a replacement they get to pick and price.

COST

Cost for the death and injury warranty will be 10% of purchase price, due at the time of purchase. If a customer chooses not to cover their animal against death and injury, they assume all loss due to death or injury of their bull. This warranty does not affect other customer services like the quality and calving ease guarantees that all Flying H Genetics bulls carry.
